

## CERTIFICATE OF COMPLIANCE

**EET Corporation and Fleetguard, Inc.**

**certify that**

the engine coolant reinhibitor packages offered by EET Corporation have been specially formulated and designed by Fleetguard, Inc. to replace additives in coolants recycled by EET Corporation's coolant recycling systems. Used engine coolant may be recycled with EET's recycling system(s), and when recycled in accordance with EET's recycling procedure, a recycled virgin quality product will be produced. When this recycled virgin quality product is reinhibited with EET-furnished reinhibitors, manufactured for EET by Fleetguard, Inc., as directed by Fleetguard's blending procedures, the undersigned herewith certify that the finished product meets the American Society for Testing Materials ASTM D-6210 specification for fully formulated engine coolant. The undersigned also certify that this recycled, reinhibited engine coolant product meets or exceeds all OEM heavy-duty fully formulated coolant requirements including Cummins, Caterpillar, Detroit Diesel, International, Volvo, and Mack specifications.

Sincerely,

David L. Brisk
